

Three-way Free-way

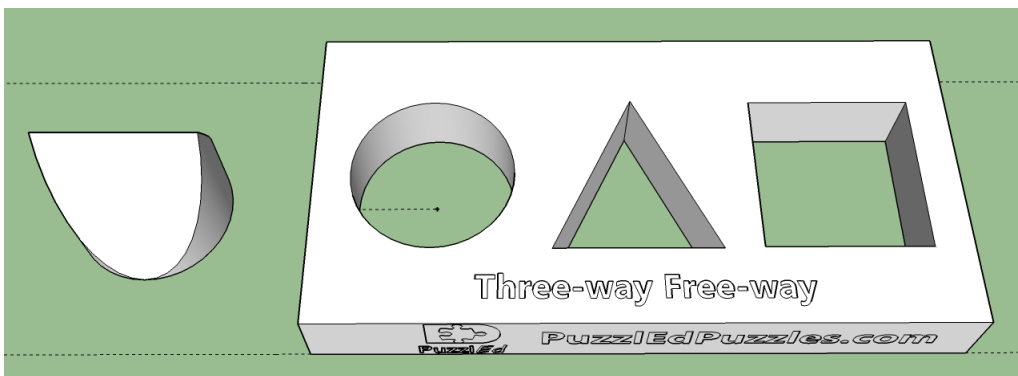

Goal: To pass the small piece through each of the three openings in the board with the piece oriented to perfectly fit and fill each opening.

How it works: This puzzle has two parts, a small oddly shaped piece and a board with three shapes, a circle, a triangle, and a square cut into it. The player is to take the small piece and pass it through all three openings with the piece properly oriented to exactly match the shape it is passing through.

Strategy: Many people see one or more of the shapes on the piece very quickly and can solve those parts immediately. If necessary, hold the piece up and rotate it through several orientations to see if you can find the desired shape in one of the profile views of the piece as you observe it.

The three solutions are shown on back.
